

Asbestos Update:

In compliance with the U.S. Environmental Protection (EPA) Asbestos Hazard Emergency Response Act (AHERA), in the fall of 1988 we performed inspections of each of our school buildings for asbestos-containing building materials. The inspection findings and asbestos management plans have been on file in each school administrative office since that time. The EPA requires us to perform re-inspections of the asbestos materials every three years. Routine surveillance is conducted every six months on remaining ACM materials. The results of the re-inspection are on file in the management plan in each school's administration office. Everyone is welcome to view these anytime during school hours.
